Dear Hiring Manager,

I am very excited to apply for 2022 summer internship. I understand you are looking for 2022 summer student intern and I believe my knowledge and skills can provide a significant advantage in the growth of the organization.

I am an ongoing Postgraduate student in First Year of Computer Science major withholding excellent academic record in bachelor's degree in Computer Engineering. I am interested in the field of Computer Science and its applications. I like to work with front-end languages like htmI, css, javascript and its frameworks. Moreover, I have an experience with IT corporate TCS where I used to make Web applications with the help of canvas where we used html,css,javascript, php and many other languages. We used to work with CloudFlare CDN, Acquia Docroots, Platform.sh, Jenkins and many more software development tools. Working with development team and support team makes me understand the significant difference and working methods that I can apply in my future endeavors. With this knowledge and skills, I would like to apply for this summer internship position where I can utilize my knowledge and skillsets while getting the most valuable experience on field. I believe I can contribute towards the growth of the firm with this precious opportunity.

As the Software Developer at Tata Consultancy Services, I was at the System Engineer position with the role of software engineer. Where I used to handle all the janssen pharmaceutical sites. I was responsible to make websites optimized and running smooth as possible. Also, with maintaining legacy sites docroots in Acquia. We were maintaining the pharma sites for North America Region and Consumer sites for Latin America Region. I am also blessed to get some kind words from the clients reside at NA region and Tech leads as well as supervisors.

Moreover, I am a machine learning practitioner, exploring other fields like data science, cloud computing where I always looking out for the best interests of the company. I enjoy working in agile methods and as a team. I developed Virtual reality and Augmented Reality applications. I am also interested in the field of cyber security and its applications. I believe I can bring change with the professional and interpersonal skills I have and to be developed by the internship opportunity. I am very much interested in learning new things. I keep my self-updated with the new generation technologies.

Thank you for your time and consideration. I am looking forward to learning more details about the Role and firm. This opportunity can furnish me with the relevant knowledge of the industry, and I can contribute more towards the company's market share.

Sincerely,

Sagar Pathak
